

Index of words

algebraic over F	88
Algebraically closed fields	87
anti-dictionary	111
anti-lexicographic	111
antisymmetric	25
Arguments by contradiction	1
argument	11
Associative law	96
Axiom 0	3
Axiom of choice for families of finite sets	90
Axiom of choice for families of two-element sets	90
Axiom of choice for families of well-orderable sets	90
Axiom of choice, second form	49
barber paradox	5
basis	86
bijection	16
binary relation	8
Boolean prime ideal theorem	90
Cantor's diagonal argument	54
Cantor's diagonal argument	96
cardinal number	48
cardinality of	39
cardinality	49
cardinal	48
cartesian product	17
characteristic function	55
class function	58
closed	41
Closure theorem, II	72
Closure theorem	41
closure	41
cofinality	97
Commutative law	95
complement	5
Complete transfinite induction	76
composition	14
Comprehension axioms	4
contained	3
continuous	92
continuum hypothesis	55
continuum hypothesis	93
Contrapositive	1
converses	1

converse	1
Countable axiom of choice	90
countable	50
Dedekind cut	43
denumerable	50
disjoint	6
Division algorithm	111
domain	8
empty set	5
Equality	2
equipotent	38
equivalence class of a under \sim	22
equivalence relation on A	22
Equivalence-Partition theorem	23
Equivalences	2
Existence	2
exponentiation	65
exponent	38
Extensionality axiom	3
finitary partial operation	41
finite sequence	32
finite	39
first coordinate	8
For all	2
Foundation axiom	17
function	11
generalized continuum hypothesis	56
Hausdorff	100
identity function	15
iff	2
image	13
Implications	1
induction principle	30
infinite sums	68
Infinity axiom	29
injective	15
integers	42
intersection	5
intersection	6
intersection	6
inverse	10
irreflexive	25
isomorphism	57
König	96

least element principle	32
least	25
liar paradox	5
limit cardinal	93
Limit ordinals	75
linear combination	86
linear ordering	25
linearly independent	86
Main theorem of cardinal arithmetic	100
mapping	12
maps onto	12
members	3
multiplication	62
natural numbers	30
number of elements	49
one-one	15
ordered pair	8
Ordering principle	90
ordinal number	47
Ordinal representation theorem	59
ordinal	47
or	2
Pairing axiom	4
partial m -ary operation	40
partial ordering	25
partition	23
poset	25
power set axiom	9
power set	9
pre-image	13
principle of complete induction	32
Product choice axiom	83
product	9
proper subset	3
property	4
quasi-ordering	25
range	9
rational numbers	43
real	43
Recursion theorem for ω	32
recursive definitions	32
reflexive on A	22
regular	98
Replacement axiom	59

restriction	17
second coordinate	8
simple ordering	25
singleton	4
singular	98
size of	39
size	49
smallest	25
span	86
strictly increasing	57
strictly increasing	92
subset	3
substitute equals for equals	2
successor cardinal	93
Successor ordinals	75
sum	60
surjection	12
symmetric difference	6
symmetric	22
the number of elements of	39
transfinite induction	76
Transfinite recursion principle	77
transitive closure	80
transitive	22
transitive	47
truth values	1
unbounded	97
Union axiom	4
union	4
unordered pair	4
vacuously true	1
value	11
vector space	86
weak partial ordering	25
weak poset	25
well ordering	25
Zorn's Lemma	83
