

Project 1: Project Proposal

The goal of this project is to introduce and motivate your project. Give an introduction to the main topics and why one might find them interesting. Try to state the main results as nontechnically as possible, and discuss some interesting consequences (if there are any). Give the key references you will be using.

Due electronically: 11am, October 7, 2016

You should email me a .pdf. I will not require a paper copy.

Extra Credit: Do the project in L^AT_EX

If you do this, then email me the .tex file in addition to the .pdf file.
